

## Table of contents

---

### 1. Algebraic Thinking

1. Inverse Operations
2. Multiplication and Division Strategies 1
3. Multiplication and Division Strategies 2
4. Equations
5. Solve Equations
6. Word Problems and Writing Equations
7. Logical Reasoning
8. Number Lines and Codes
9. Programing Spreadsheets
10. Dependent Variables
11. Cost Calculation Spreadsheets
12. Area and Exponents
13. Exponent
14. Apply
  - Focus
  - What I've Learned

### 2. Geometry and Measurement

1. Circle
2. Symmetry and Mirroring
3. Measuring Angles
4. Drawing Angles and Polygons
5. Rotations and Translations
6. Scale Drawing
7. Converting Units of Mass and Length
8. Perimeter and Area
9. The Area of Parallelograms and Triangles
10. Units of Area
11. Three-Dimensional Shapes
12. The Volume of a Cuboid
13. Units of Volume
14. Litre
  - Focus
  - What I've Learned

### 3. Revision

1. Order of Operations
2. Apply the Order of Operations
3. Place Value of Large Numbers
4. Place Value of Decimals
5. Relating Fractions and Percentages
6. Discount Percentage
7. Apply Percentages
8. Short Division
9. The Standard Algorithm and Decimals
10. Multiplying Decimals
11. Relating the Basic Operations
12. Units of Time
13. Elapsed Time
14. Solve Math Problems
  - Focus
  - What I've Learned
